As Indian market demands highly fuel efficient vehicle, Hero Moto Corp launched Splendor iSmart . Splendor iSmart sports a funkier looking cowl head lamp bundled with new meter. Three tone colour scheme, split grab rails, racing strips on the rear cowl, and aluminium is what lends the Splendor iSmart a distinct look. The instrument cluster is also a brand new unit with a new additional feature called side stand indicator, a first for Hero. Alloy wheels, kick start, electric start and engine guard come as standard fitment. Extremely comfortable riding position with low seat height, raised handlebars and rear set footpegs. This motorcycle is powered by the famous 97.cc engine which produces 7.69 BHP of power at 7500 RPM and 8.04 Nm of torque at 4500 RPM. A speed of 60 kmph is easily obtained which makes the Splendor an excellent city slicker in our crowded traffic conditions. Splendor iSmart comes with 8.7-litre fuel tank and 99% surety of delivering up to 70 kmpl. The brake liners are specially developed for this bike which gives better stopping power. Front brakes as always doesn't inspire any confidence and rear brakes do most of the job in this motorcycle.

Component Health Check

A vehicle undergoes enormous wear and tear with time. It is often imperative to inspect and replace parts of the vehicle on a timely basis to keep it in prime condition. These aspects often go unnoticed and become real pain points with time. Use the Component Health Check for maintaining your vehicle components without any hassles. It would provide the list of parts to be inspected every subsequent year based on their age to help you find out the parts needing replacement.
